Subject: RE: Draft website for Gold King Mine

They don't have separate pages at the moment (I checked with David Gray and Bonnie Barkett a few hours ago), but we want to make sure that they don't create any additional pages.

Christine and I are a little worried because around 5 people in R6 and R9 now have access to update <https://wcms.epa.gov/goldkingmine>. So, we're hoping that I'm the primary website updater (and/or Jeff), so that there aren't too many cooks involved.

Does that make sense? I'll work with whatever and whoever you think makes the most sense.

Thanks, everyone!

Hey do we know if R6 or R9 have separate pages up?

Trying to figure that out. I've asked Liz initially if we can make it live and then from there we'll figure it out with Melissa. Thanks for all your help, Tim.

Hi Roxanne!

Christine and I are really hoping that Region 6 doesn't create its own page. And We're also hoping to have **me** do the major updating of the site.

We're not sure who the final ***approver*** will be, i.e., the person who tells me exactly what to post and that it has final approval. Would it be Liz Purchia? Or you? Whoever it is, I'll happily answer and update the page right away!

Thanks so much,

Tim Davis

Thanks Roxanne

As a heads up – we will have today’s information update to release and region 6 will have our first data set. It hasn’t gone through area command just yet and we plan to parallel process with Dana.

Hi Christine:

You’ve done a wonderful job. We just need some context for the sampling results that have already been posted, some fact sheets, and Q’s & A’s. I also think that we need to put some of the information already posted into plain language so the public can more easily understand what’s happening. We’ll also need to put a link on the osc.org site telling people to go to this site once it’s launched. The OSCs can use the private side of osc.org for their purposes of communicating with first responders. I know that George is working with Dana Tulis to get context around the sampling data. I believe that Jennifer has come up with some Q’s so we’ll need the A’s and hopefully we can get some of that basic info up tomorrow.

Subject: Draft website for Gold King Mine

Hi everyone, I've created a draft site for the Gold King Mine. To view it,

- log into the Web Content Management System at <https://wcms.epa.gov/user> with your LAN ID and password.

- If you can't log in, send an email to Web CMS Support with your LAN ID; they usually take care of the odd log-in problem within a few minutes.

- Then go to <https://wcms.epa.gov/goldkingmine>

The URL for this site when published will be www.epa.gov/goldkingmine. There should be no reason to type in "www2" as part of the URL; "www" should be sufficient.

Jeff Morin in our office will be taking over for me tomorrow morning to code changes. Jeff can publish it once it's ready, and can ask Web CMS Support to redirect the existing Region 8 page to the new site. Staff in Regions 6, 8 and 9 have access to edit and publish changes to the site.

Notes on various pages:

- **Home page** –

- not sure if you want the claims form to be this prominent. If not, there are other pages that link to it. Claims form PDF is copied from the OSC site.
- I have a included placeholder for a link to a page that explains what the data indicate
- We can also easily add an FAQs page and a link on the home page to the FAQs
- **Contact Us** – emails sent using the form will go to r8eisc@epa.gov unless that feature is changed.
- **Who's responding/EPA role page** – all content of this page comes from the R8 updates, but I've organized it, added links, taken out words like “yesterday” and “tomorrow” and added a definition of flocculant agents. This page will have to be kept up-to-date daily.
- **Updates page** – new updates can easily be added
- **View raw data page** – the three PDFs from the OSC site are now copied on this site.

Let me know if you have questions. I'll be available tomorrow at 202-306-7367.
